• 01 Profile

I work where business meets IT: I listen to what people need and turn it into software that makes their work easier, together with AI. At **Parttracker** I keep the IT running and have cut hours of manual work a week. At **Buckdesign** I'm building a system for the whole company during my internship.

• 02 Experience

• 2026 - NOW

Buckdesign Software development intern: building StandDesign OS

Alkmaar

- Turning requirements from every department into a roadmap and working features.

Now · internship at Buckdesign

StandDesign OS Building the system the whole company will run on, for 10 to 15 users: every department sees its own planning and clients approve their 3D design online. The ambition is to offer it to other stand builders later on.

• 2026 - NOW

VASTIQ Backend and DevOps developer

Beverwijk

- The technology behind the scenes and the servers of the platform, in a product team of 8.
- Helping decide which features come next.
- **VASTIQ** Made sure homes appear at their real address on the map and searches are kept, so price alerts are accurate again. [↗ vastiq.ai](https://vastiq.ai)

• 2025 - NOW

Parttracker All-round IT specialist

Zaandam

- First point of contact for everything IT, for 5 colleagues at the office.
- Managing and maintaining the ERP system the business runs on, and the website.
- Built in-house tools that cut out manual work: valuations, stock and product data.
- **ValueTracker** Conceived and built a unique concept that turns a list of leftover machine electronics into a well-founded purchase offer in one go, with the potential to grow into a paid service. [↗ parttracker.eu/oev](https://parttracker.eu/oev)
- **StockTracker** Brought together the stock of twelve suppliers: one search that takes seconds instead of twelve files. [↗ stock.parttracker.eu](https://stock.parttracker.eu)
- **Stockmatcher** Built a tool that fills the webshop catalogue of 100,000+ products with prices and details. Saves two colleagues about 3 hours a week.

2025 - 2026

Stauder Tech Europe School project: the overview app Compass

Heerhugowaard

- **Compass** In a team, turned the client's wishes into screens and helped build one overview of all business information.

2025 - 2026

Independent Freelance web developer

Zaanstad

- Handled end to end: from intake and design to build and go-live.

- Alongside my studies and work, in the evenings and at weekends: about 1 to 3 hours a week.
- Daphnebrakenhoff.nl** Designed and built the website for her holistic guidance for women: visitors quickly see what she offers and how to book. [↗ daphnebrakenhoff.nl](https://daphnebrakenhoff.nl)

2025 - NOW

Stichting Veteranen Zaanstad Volunteer: website and hosting

Zaanstad

- Veteranen Zaanstad** Designed and built the website, and look after the hosting. The board keeps the calendar, photos and newsletters up to date themselves. [↗ dev.veteranenzaanstad.nl](https://dev.veteranenzaanstad.nl)

2024 - NOW

Haarwebshop Webshop manager

Wormerveer

- Helped set it up; now maintaining and improving it, mainly Google visibility and ease of use.

2021 - 2024

Freezone Event Services Audiovisual specialist

Haarlem

- The only technician on a sustainability tour through 6 European countries, with a stand for Google.
- Planning and preparing productions, and first point of contact for clients.
- Making sure the tech on site is in place the moment it needs to be.

2018 - 2020

Multicraft Temp work, including as a roofer and tree surgeon

Zaanstad

2016 - 2026

Baron Auto's Saturday help

Assendelft

03 Other projects

2026

Panora Came up with and built an app that predicts how beautiful the sunset will be and which viewpoint gives the best view. [↗ panora.thijsrosmalen.fyi](https://panora.thijsrosmalen.fyi)

2026

Sinne at Sea Built the website that raises money for Sinne's sailing trip, with a spinning globe showing the route and a counter of the money raised. [↗ sinneatsea.nl](https://sinneatsea.nl)

04 Education

2024 - 2028

Business, IT & Management Inholland University of Applied Sciences · bachelor's

Analysing processes, designing and rolling out IT solutions and guiding the change around them, often for real clients. Graduating in 2028.

2014 - 2021

HAVO, then VWO Bertrand Russell College · Science & Technology
